DETAILED ACTION

1. Acknowledgment is made of applicant's Terminal Disclaimer, which was received by the Office on June 22, 2006 and approved by the Office on August 3, 2006.

Claim Rejections - 35 USC § 112

2. In view of applicant's modifications to the claims, the Examiner is withdrawing the 35 U.S.C 112 2nd paragraph rejection, which was made against claims 21, 30, and 31 in the last Office action.

Double Patenting

3. In view of the applicant's submission of a Terminal Disclaimer, the Examiner is withdrawing the double patenting rejection, which was made against claim 29 in view of U.S. Patent No. 7,013,178.

Allowable Subject Matter

4. Claims 1-32 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The Examiner would like to cite the Renger (US 5,593,430) patent for its pertinent 2-wire interface. Unlike applicant's device, the Renger patent did not specify applicant's claimed bit pattern protocol used for communicating with slave devices.

Also, the Neumann (US 5,464,435) patent is cited for recitation of an implantable medical device communicating with a plurality of slave devices over a bus (Fig.2). Unlike applicant's architecture, the bus of Neumann appears to be a multi-wire parallel bus rather than a 2-wire serial interface. Its protocol is also different.

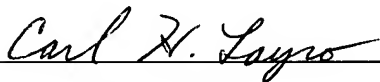

Neither references indicates the power status of the slave device, as claimed by the applicant (claim 20).
